

## Product Data sheet

**Part Number: 112011****Name:** Zinc Aluminum Wire**Chemical Composition (%):**

Al	Zn
22	78

**Description and Applications**

- Compared with the zinc wire and pure aluminum wire, zinc/alumina coating has better coherence, resistance to wear and corrosion resistivity.
- It is an ideal anti-corrosion material to sea water.

**Melting Range:** 430-490°C**Brazing Temperature:** About 450°C**Wire Diameter:** 1.6mm, 1.8mm, 2.0mm, 2.2mm, 2.4mm**Packing Type:** MIG 0.5kg/1.0kg/2.0kg/5kg/spool

TIG 0.5-2.0kg/plastic tube
