## ZnAl Alloys

**BEIDUO® Alloys**

Providing Complete Brazing, Soldering & Welding

000214

Zinc-Aluminum Alloy Wire / Rod / Strip

### Classification

Zn90Al10

### Chemical Composition(%):

Zn	Al	Cu	Fe	Mg	Ni
Balance	10	0.08	0.03	0.018	0.01

### Description and Applications

Melting Range: 300-452°C

Stability like spraying Aluminum , electrochemistry protectiveness like spraying zinc.

It is an ideal anti-corrosion material to sea water.

It is widely used in the area of anti-corrosion area, oil chemical, wind and electric, port, food brewing bridge and so on.

Also used in aluminum to aluminum , Aluminum to Copper brazing

### Availability

Wire Diameter: 1.6-4.0mm

Rod Diameter: 1.6-4.0mm

Strips Size: According to customer's requirement
